STANDARD OPERATING PROCEDURE			AU-2600
	SARPY COUNTY SHERIFF'S OFFICE PAPILLION * NEBRASKA **GREG LONDON** **SHERIFF**	DATE ISSUED 05/20/21	DATE REVISED **03/16/23**	DATE REVIEWED 02/02/25
		APPROVED: *GREG LONDON*		
CHAPTER TITLE AUXILIARY UNITS: SPECIAL WEAPONS AND TACTICS	RESOURCES			
SUBJECT SWAT TEAM HELMET WORN CAMERAS	CROSS REFERENCE			

I. Purpose:

The purpose of this policy is to establish guidance for operating and maintaining SWAT Team helmet mounted cameras (HWCs) for the Sarpy County Sheriff's Office SWAT Team members. The helmet mounted cameras are specific to the Sarpy County Sheriff's Office SWAT Team members.

II. Policy:

A. The Sarpy County Sheriff's Office SWAT Team members shall have HWCs worn and operated during SWAT deployments where the team members are in full body armor. The Sheriff's Office recognizes that SWAT activations are unique from standard law enforcement activity and that it is not feasible to operate HWCs in the same manner as body worn cameras (BWCs). SWAT deployments where HWCs use is impracticable may include but are not limited to:

1. Hostage Rescue
2. Dignitary Protection
3. Special Event Quick React Teams (QRT).

B. HWCs will be assigned to SWAT Team Leaders, Assistant Team Leaders and Team Members. Each operator is responsible for ensuring his/her assigned helmet camera is functioning properly. Any HWC that is improperly functioning shall be reported to the SWAT Team Commander immediately for repair/replacement.

III. Procedures:

A. HWC Operation: SWAT HWCs are powered by lithium batteries and record using micro-SD cards. To preserve battery life and storage capacity, HWCs shall be activated when Team members are preparing for the following events:

1. Entering a structure for search/secure/apprehension purposes.
2. Anticipated suspect/subject exiting a structure/vehicle.
3. Vehicle take downs.
4. Anticipated deployment of FSDD, chemical, and/or less lethal munitions/devices.
5. Search warrant perimeter assignments.
6. When ordered by SWAT Command/Team Leader/Assistant Team Leader.

B. Extended Events: HWC's may be turned off during SWAT deployments to preserve battery life and storage capacity. Anytime a Team member is on relief or at the command post, he/she shall shut off the HWC. SWAT Team Leaders or Assistant Team Leaders may allow team members who are operating as a pair to rotate activation of their HWCs as a means of extending battery life and maximizing storage capacity. During these rotational periods, team members shall ensure that at least one HWC is activated. SWAT deployments were HWC rotation is practical may include but are not limited to:

1. Hostage Rescue
2. Hostage/Barricaded Suspect Perimeter Assignment
3. Civil Unrest/Riot response
4. Scene security

IV. Retention and Storage

A. Post Activation: Following a SWAT Team deployment, members will turn in their HWC micro-SD card to the SWAT Commander. The commander will provide a clean micro-SD card in return.

B. File Storage: The Team Commander will place the used micro-SD card in a small bag marked with the Team member's badge number. All the micro-SD cards will be downloaded to cloud storage.

C. Reportable Events: Should a Team Leader, Assistant Team Leader, or Team Member(s) take reportable enforcement action (i.e., Use of Force) or become the subject of an immediate complaint, they shall adhere to the Sarpy County Sheriff's Office policy on reporting and evidence submission. Breaching and flash bang deployment shall not be considered reportable under this section unless deemed so by the Team Commander.
