STANDARD OPERATING PROCEDURE			CS-3800	
	SARPY COUNTY SHERIFF'S OFFICE PAPILLION * NEBRASKA **GREG LONDON** **SHERIFF**	DATE ISSUED **10/04/24**	DATE REVISED	DATE REVIEWED 02/02/25
		APPROVED: *GREG LONDON*		
CHAPTER TITLE COURT SERVICES		RESOURCES		
SUBJECT FEDERATION & SCHOOL ACCESS		CROSS REFERENCE		

I. Purpose:

The purpose of this policy is to establish the procedures for accessing school district camera systems and building during emergency situations.

II. Policy:

It is the policy of the Sarpy County Sheriff's Office to protect innocent life by any legal means possible. Deputies responding to emergency/disaster situations at schools shall accomplish this goal by immediately using any legal means at their disposal to address the threating situation. This may include "live streaming" school district camera systems and accessing all available points of entry.

The goal is to stop the active threat before innocent people are killed or injured. This shall be the duty and responsibility of the initial responding deputies. The initial responding deputies are authorized to access the school district camera system and all available access points prior to the arrival of command officers, specialty units, or permissions are received from school district officials.

These procedures are not intended to limit conventional law enforcement tactics, which may be appropriate to the situation. These procedures represent an additional means of intervention available to deputies and with the use of these procedures there is the potential of elevated risk. The risk is acceptable considering the potential these procedures have for saving lives.

III. Definitions:

A. **Federation**: Federation involves different computing entities merging operations to facilitate collective communications between networks.

B. **Emergency/Disaster:** A response from the SCSO or combined response from multiple law enforcement agencies to an event involving the potential for the loss of life, serious injury, or substantial property damage.

C. **School Building Access:** During an emergency/disaster, school officials have granted deputies permission to enter district buildings by utilizing their SCSO-issued access ID cards. Emergencies shall be limited to the following:

1. An active killer/threat within a school building.

2. A school emergency radio activation at the school building.

3. A Help-an-Officer incident within a school.

4. When a responding deputy has a reasonable belief, an incident is occurring within the school building involving an immediate threat of violence or bodily injury.

5. When a school administrator contacts 911 Dispatch and specifically communicates that SCSO deputies may make immediate entry to a school.

6. When a deputy has a reasonable belief that serious property damage is occurring within a school building (i.e., water main break, fire, etc.).

D. **Camera System:** Includes “live streaming video” from exterior and interior cameras located on the involved school district property.

E. **Agency Approved Device and Software:** A computer, smartphone, or tablet, that has the GENETEC Security Center software installed.

IV. Procedures:

A. The SCSO shall authorize designated deputies access to “live streaming video” from an involved school district. The names of the authorized personnel shall be provided to the district. Any changes in authorization shall be reported to the school district within seven (7) days.

B. When practical, the SCSO shall obtain consent from the district before accessing live-streaming video.

C. When consent is not practical, the SCSO shall provide the district with written notice of the access and reason(s) why within two (2) hours of the incident. The district may grant further access depending on the situation.

D. The SCSO shall keep a log of all video access it has made within the past ninety (90) days, and upon written notice, provide such logs to the district within five (5) business days.

E. The SCSO shall not release any live-streaming video footage without prior approval from the district.

F. Receipt of Emergency/Disaster Call: All available deputies shall respond to emergency/disaster situations occurring at a school.

1. Time permitting, deputies may utilize an agency-approved device (i.e., computer, cellphone, tablet, etc.) to access (Genetec) "live streaming video" from the involved school camera system.

2. Live streaming video shall be utilized for the purpose of identifying and locating:

a) The involved killer/threat
b) Victims
c) Hazards
d) Access/exit points
e) Building/property design

3. Deputies may access a school building through any point of entry that allows for a tactical advantage.

4. Command officers may respond to an off-site location (i.e., EOC, command post, school district building, etc.) to live stream video from an agency approved device and software.

V. Reporting:

A. All incidents involving live steaming video and/or emergency/disaster school building access shall be documented.

1. The deputy initiating live streaming video shall complete an information report noting the:

a) Reason
b) Starting and ending time
c) Entities present
d) School district notification

2. Excluding SRO's, any deputy using their SCSO issued ID to access a school building shall complete and information report.

B. Live streaming video for training and system maintenance shall be documented on a video access log vis the Technical Support Deputy.

C. The SCSO shall keep a log of all video access it has made within the past ninety (90) days, and upon written notice, provide such logs to the district within five (5) business days.

VI. Training:

A. All deputies who have been granted live streaming access shall receive annual training.

B. The Technical Support Deputy shall coordinate all training.
