STANDARD OPERATING PROCEDURE			G-12000
	SARPY COUNTY SHERIFF'S OFFICE PAPILLION * NEBRASKA **GREG LONDON** **SHERIFF**	DATE ISSUED 04/06/22	DATE REVISED **09/19/24**	DATE REVIEWED 02/02/25
		APPROVED: *GREG LONDON*		
CHAPTER TITLE GENERAL		RESOURCES CALEA CHAPTER 46		
SUBJECT ALL HAZARDS PLAN		CROSS REFERENCE		

I. Purpose:

The purpose of this policy is to establish the guidelines for responding to incidents, generally of an emergency nature, that result from disasters, both natural and man-made, pandemics, hazardous material spills, train derailments, terrorist attacks/threats, missing persons, major planned events, law enforcement emergency responses, civil disturbances and any other event requested by the Sheriff of Chief Deputy.

II. Policy:

The Sarpy County Sheriff's Office shall have a plan for responding to critical incidents. This plan will follow the structure of the National Incident Management System (NIMS); which includes the incident command system as a component. These principles are considered "best practice" for response to critical incidents.

III. Definitions:

A. Commander: A Captain, Lieutenant, or designee in charge of a division or person(s) designated by the Sheriff to command specific incidents.

B. Incident: An occurrence, natural or manmade, that necessitates a response to protect life or property. In NIMS, the word "incident" includes planned events, as well as emergencies and/or disasters of all kinds and sizes. Examples of an "incident" include, but are not limited to, tornados, floods, hazardous material spills, train derailments, terrorist attacks/threats, missing persons, public health emergencies, and other major planned events and law enforcement emergency responses.

IV. Procedure:

A. Implementation:

1. The response to an incident shall be initialed by the first-arriving Commander to the incident. The first-arriving Commander shall retain the role of Incident Commander until formally relieved by another Commander. In the absence of an on-duty Commander , a Sergeant may establish Incident Command and formally turn Incident Command over to the first Commander who arrives on scene.

   a) Command of an incident may be turned over to the High-Risk Incident Commander if dictated by other SOPs, such as P-5010 High-Risk Incident Command.

2. Auxiliary Unit Commanders are responsible for the tactical planning related to their units.

3. Deputies shall complete ICS 100, ICS 200, and ICS 700 prior to attending the academy. The Sarpy County Emergency Management Director is responsible to ensure that additional formal training is available.

4. Documented annual training on the All Hazards Plan, to include Incident Command System (ICS) will be provided to all affected employees. This will consist of, at a minimum, all employees reviewing this policy.

5. The Sheriff's Office shall participate in a documented biennial training consisting of a tabletop or full-scale exercise to assess capabilities with the All Hazards Plan and the Incident Command System.

B. **Incident Command System (ICS)** The Incident Command System (ICS) through the National Incident Management System (NIMS) will be used during all critical incidents. This system provides a clear point of control and can be expanded or contracted with ease to escalating or diminishing situations. Specific principles of ICS are contained in the NIMS manual, which can be accessed at FEMA.gov. They include:

1. ICS/NIMS system activation.
2. Command protocols.
3. Written plans/procedures.
4. Forms (ICS Resource Center).

C. **Functional elements of ICS:** The functional elements of the ICS are: Command; Operations; Planning; Logistics; and Finance/Administration. The Road Patrol will handle most regular incidents and functions on their own, with minimal assistance from an Investigator or the Crime Lab. However, for larger incidents all functions of the ICS may be activated and staffed by auxiliary personnel.

1. **Command Function:** The Command Function is responsible for:

a) Activating the Incident Command System.
b) Establishing a Command Post.
c) Initiating the notification and mobilization of agency personnel.
d) Obtaining support of other agencies, if necessary.
e) Establishing a Unified Command, if necessary.
f) Establishing a Staging Area, if necessary.
g) Providing public information and maintaining media relations.
h) Maintaining the safety of all affected personnel; and
i) Preparing an after-action report.

2. Operations Function: The Operations Function is responsible for:

a) Establishing perimeters.
b) Conducting evacuations.
c) Maintaining Command Post and scene security.
d) Providing for detainee transportation, processing, and Confinement.
e) Directing and controlling traffic.
f) Conducting post-incident investigations.

3. Planning Function: The Planning Function is responsible for:

a) Preparing a documented incident action plan.
b) Gathering and disseminating information and intelligence.
c) Planning post-incident demobilization.

4. Logistics Function: The Logistics Function is responsible for:

a) Communications.
b) Transportation.
c) Medical support.
d) Supplies.
e) Specialized team and equipment needs.

5. Finance/Administration Function: The Finance/Administration Function is responsible for:

a) Recording personnel time.
b) Procuring additional resources.
c) Recording expenses.
d) Documenting injuries and liability issues.
e) Preparing appropriate reimbursement documents.

6. Emergency Operations Center (EOC): The EOC may be activated

in coordination with the Sarpy County Emergency Management Agency. If activated, the EOC will usually be staffed by senior staff of all involved agencies.

7. **Emergency Staffing:** The Sheriff, or designee, shall determine the staffing policy during the declaration of any emergency.
