STANDARD OPERATING PROCEDURE			G-8510
	SARPY COUNTY SHERIFF'S OFFICE PAPILLION * NEBRASKA **GREG LONDON** **SHERIFF**	DATE ISSUED **09/30/25**	DATE REVISED / DATE REVIEWED
		APPROVED: *GREG LONDON*	
CHAPTER TITLE GENERAL	RESOURCES		
SUBJECT REMEDIAL TRAINING		CROSS REFERENCE CALEA STANDARD 33.1.5	

I. Purpose:

The purpose of this policy is to establish the guidelines for remedial training for deputies within the divisions of the Sarpy County Sheriff's Office.

II. Policy:

Remedial training is individualized instruction used to improve specific deficiencies in personnel performance, based on the required knowledge, skills, and abilities for deputies employed at the Sarpy County Sheriff's Office. This policy addresses the need for remedial training recognized during Sheriff's Office training and evaluation during routine job performance. **Remedial training is not discipline**. It is intended to improve confidence, knowledge, skill, and ability during performance of duties, thereby delivering the Sheriff's Office mission to provide for community safety.

III. Definitions:

1. **Deficient Performance:** Performance that does not meet standards described in policy and/or training lesson plans. This performance may cause an articulable safety risk or increased liability to the employee and/or the Sheriff's Office. This performance is outside the norms of common error.

IV. Types of Remedial Training:

1. **Job Performance:** Personnel with the rank of Sergeant/Supervisor or above may recommend remedial training for personnel under their supervision/command as a result of a witnessed performance deficiency.

2. **Deficient Training Performance**: Any SCSO instructor may recommend remedial training as a result of deficient performance during Sheriff's Office mandatory training.

3. **Employee Request:** Any employee may request remedial training for themselves in an area they feel needs improvement for sufficient performance of their duties.

V. Procedure:

A. Request for Remedial Training: It is the goal of the Sarpy County Sheriff's Office to correct deficient performance the same day it occurs. When that cannot occur and it is determined an employee requires/may benefit from remedial training, a memorandum shall be completed listing the following:

1. Date of the deficient performance
2. Description of the deficient performance
3. Any supporting materials regarding the need for remediation

B. Request Review and Scheduling:

1. The memorandum shall be forwarded to the Professional Standards Division Commander who shall notify the employee's chain of command. The affected Division Commander, the Professional Standards Division Commander, and the pertinent instructors shall review the request with its supporting documentation and determine if remedial training is necessary.

2. The Training Unit shall select two instructors to build and provide the training lesson plan and resource the training.

3. The Professional Standards Division shall notify in writing, the employee required to attend remedial training of the date, time, and location of the training. A remedial training lesson plan will be provided to the employee prior to the training. The training shall be completed within 10 calendar days of the notification unless logistics require additional planning time.

C. Documentation: At the conclusion of the remedial training, the trainer(s) shall complete a performance memo with a subject line stating, "Additional Training Received." The trainer shall forward the memo to the employee's chain of command and the Professional Standards Commander. The memorandum shall include:

1. The learning objectives.
2. Date, time, and length of training.

D. Failure to attend or fully participate in remedial training shall be reported to the Professional Standards Commander and the employee's Division Commander and may result in discipline.

E. Remedial training shall not be deemed to be a Performance Improvement Plan (SOP G-5820). Remedial training may exist within a PIP as an element, but a PIP does not exist within remedial training.
